# 0. VIDEO TUTORIAL (DIVI MACHINE EXAMPLE)

## How to Import and Customize a Divi Machine Layout Pack

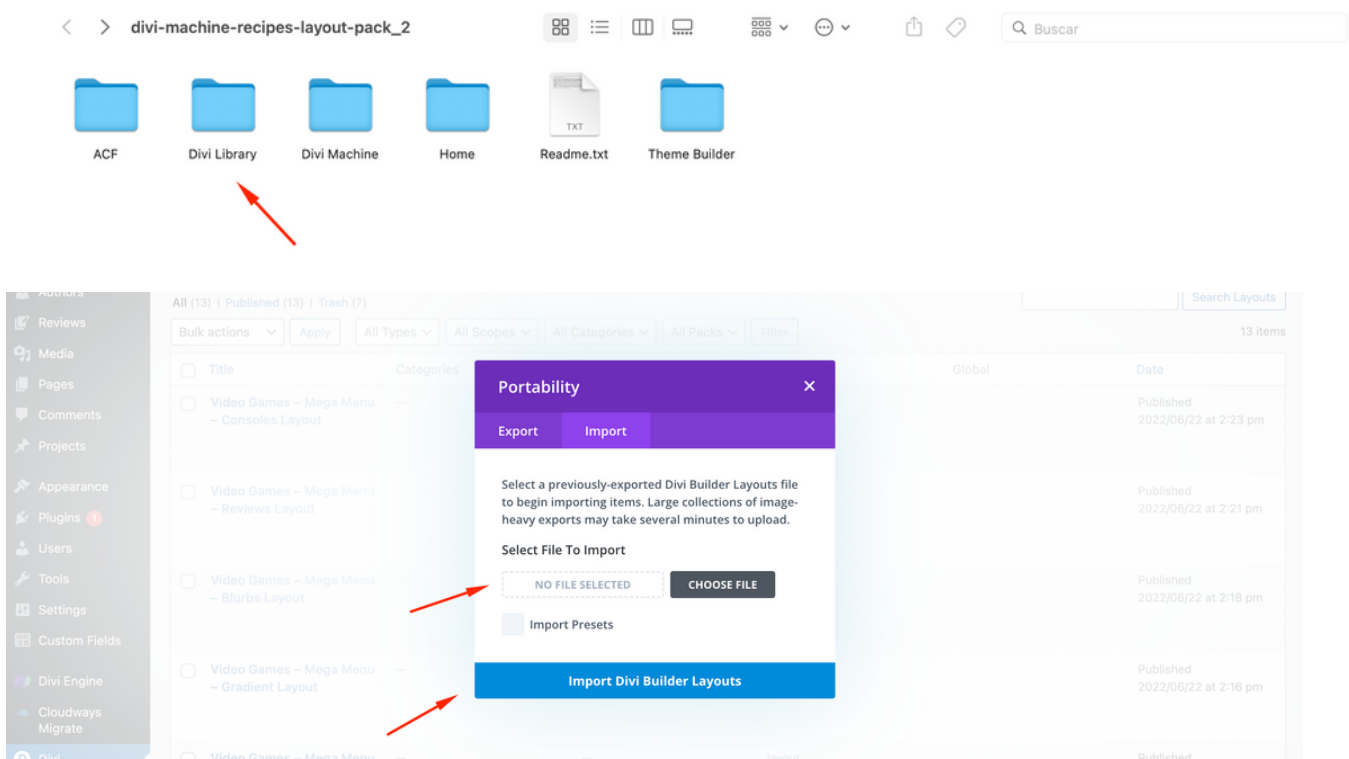

[View Tutorial](#)

# 1. GENERAL STEPS (ALL PLUGINS)

## Importing the Divi Library Layouts

Import the JSON file located in the Zip File: Divi Library folder > "name of the layout".JSON to Divi > Divi Library.

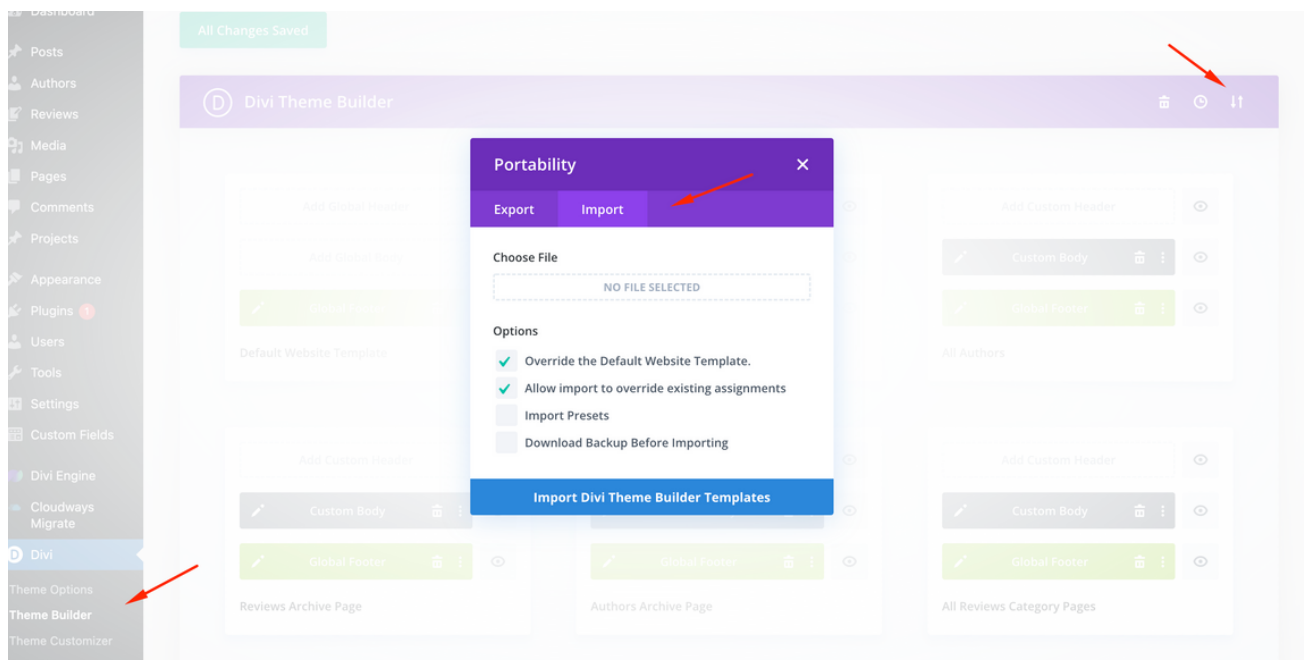

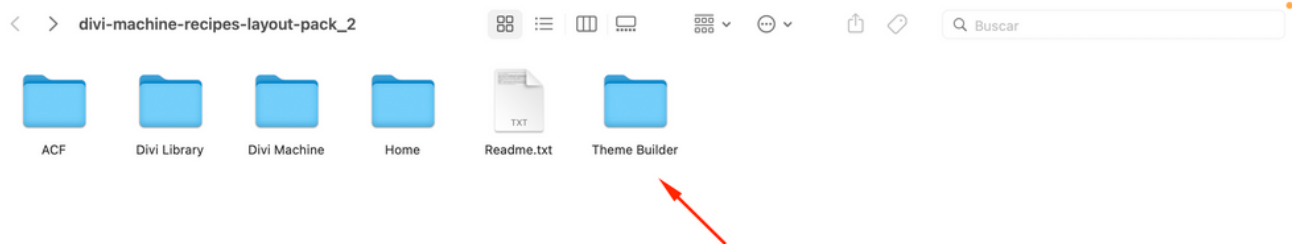

Make sure to check the layout download page to see what Options you need to follow to make sure the layout works correctly.

## 2. THEME BUILDER (BODYCOMMERCE AND MACHINE)

### Importing the Theme Builder Layouts

Import the JSON file in the zip file Theme Builder > "name of the layout".JSON to Divi > Theme Builder

## 2. DIVI MACHINE

### Step 1: Creating Required Custom Post Types

a) You'll need to create some custom post types in Divi Machine to make the layout display correctly, check the layout download page to see what custom post types you need to create. Make sure that the slugs are correct, otherwise, you might have issues.

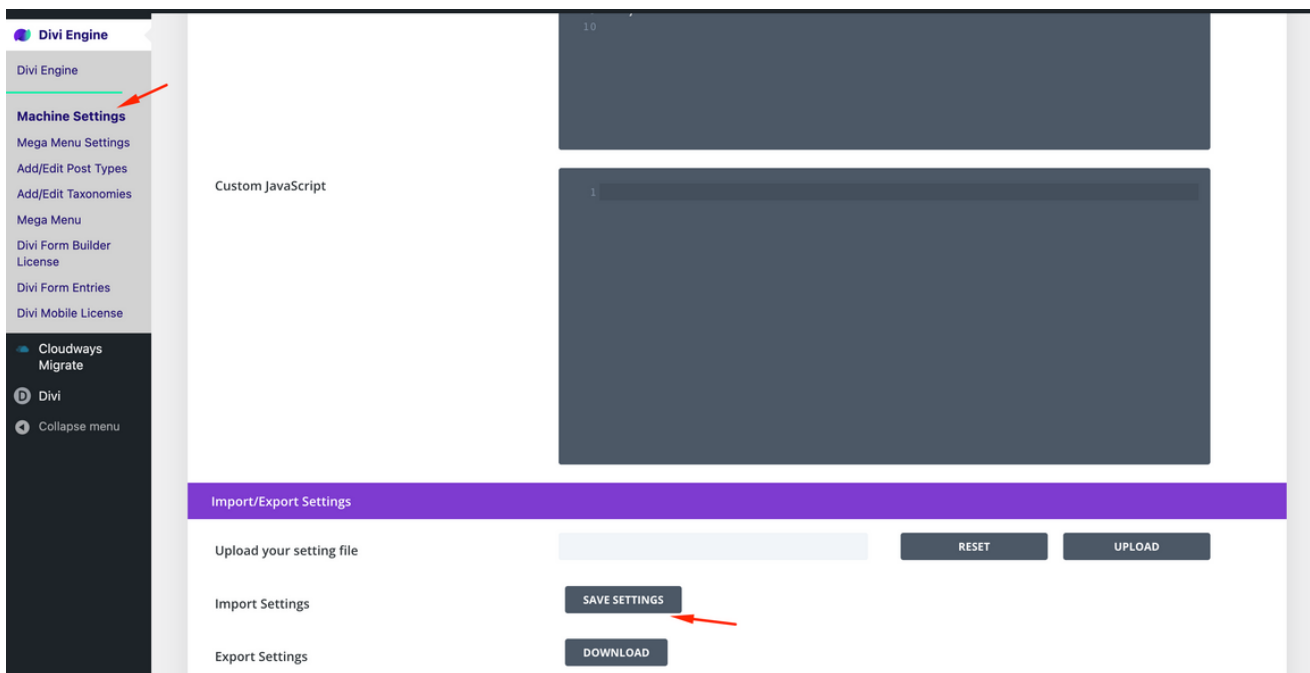

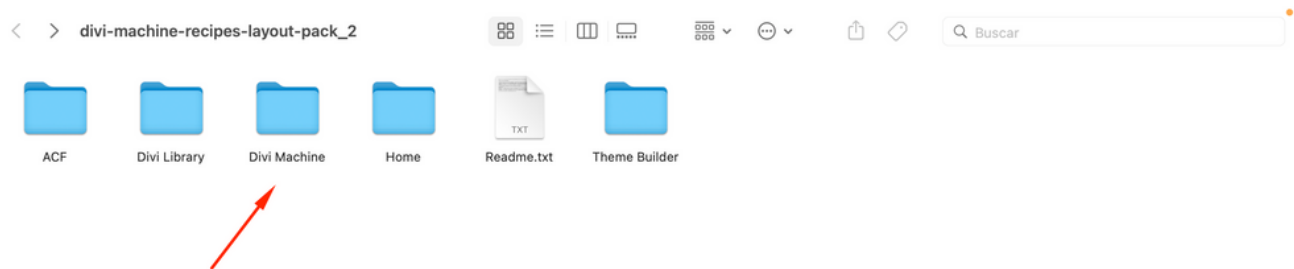

The screenshot shows the WordPress 'Post Types' management screen. The main content area displays a list of post types: 'Title', 'Author', 'Reviews', and another 'Title'. The 'Add New' button is highlighted with a red arrow. The left sidebar shows the 'Divi Engine' menu with 'Add/Edit Post Types' highlighted by another red arrow.

<input type="checkbox"/>	Title	Date
<input type="checkbox"/>	Author	Published 2022/05/16 at 9:44 pm
<input type="checkbox"/>	Reviews	Published 2022/05/16 at 9:40 pm
<input type="checkbox"/>	Title	Date

# 2. DIVI MACHINE

## Step 2: Importing Divi Machine Settings

Import our settings in the zip file Divi Machine > "name of the layout".csv. Import this in the settings tab located at: Divi Engine > Machine Settings > Import/Export Settings

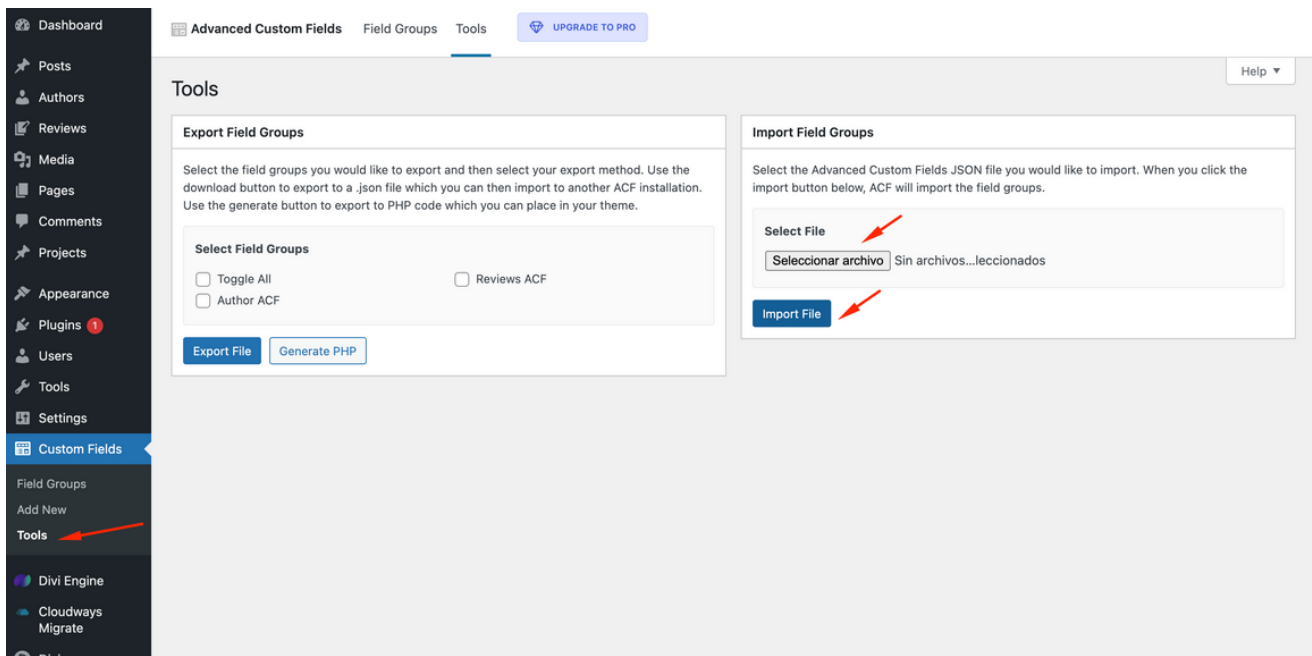

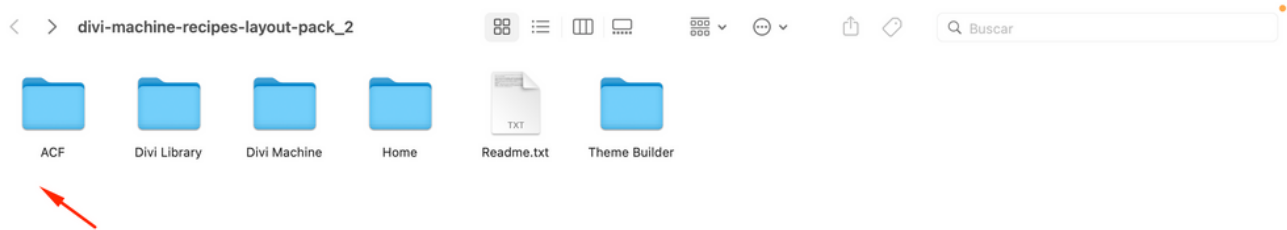

# 2. DIVI MACHINE

## Step 3: Importing Advanced Custom Fields

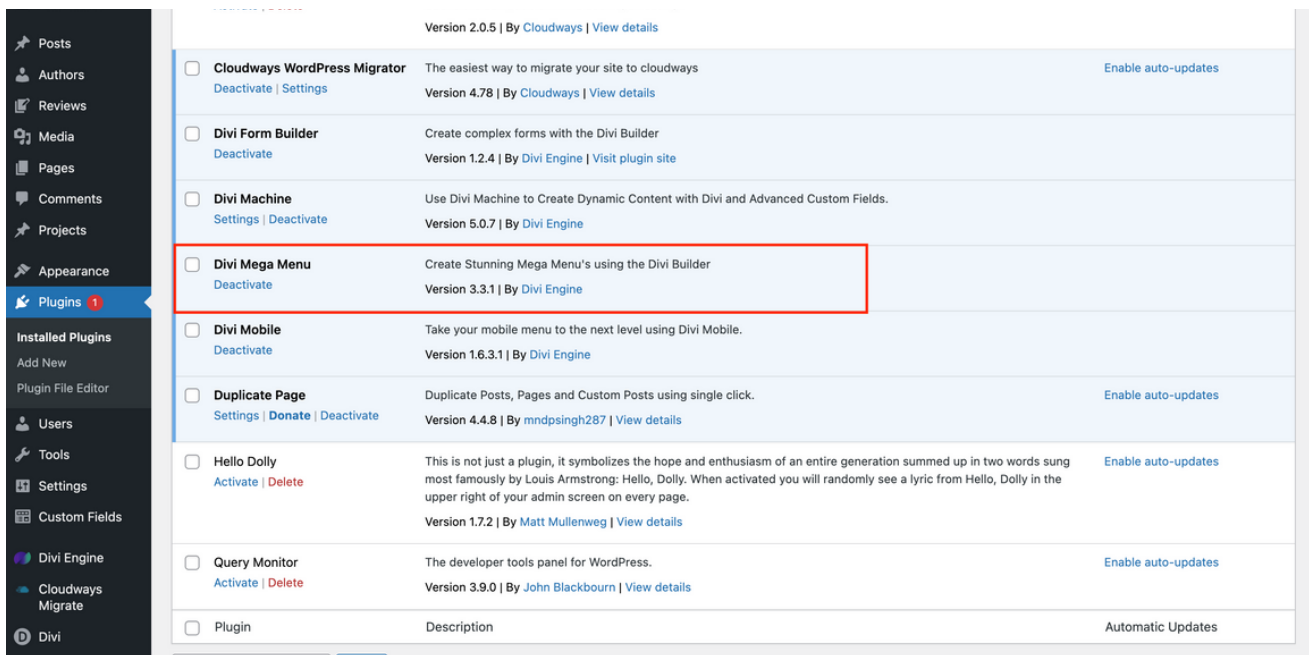

Import the ACF settings file in the folder ACF > "name of the layouts".JSON to ACF settings in Custom Fields > Tools > Import Field Groups

# 3. DIVI MEGA MENU

## Step 1: Install the Divi Mega Menu Plugin

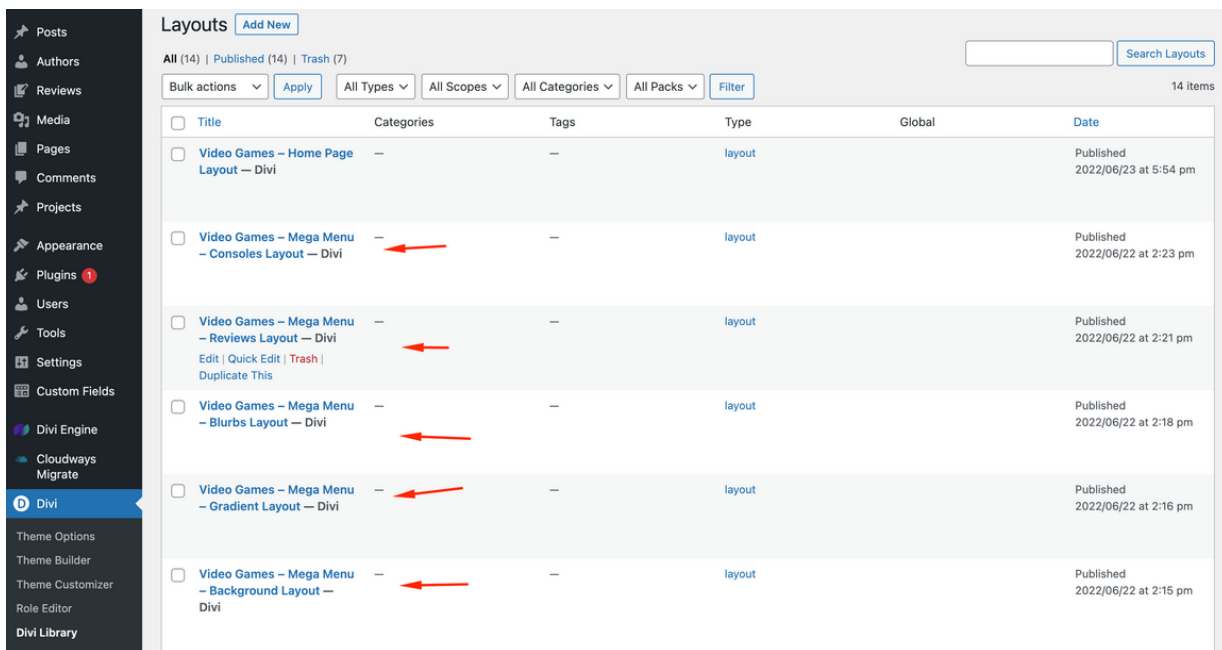

To use our Mega Menu layouts, it is necessary to have the Divi Mega Menu plugin installed, if you don't have it, you can get it [here](#).

# 3. DIVI MEGA MENU

## Step 2: Using the Divi Mega Menu Layouts

Since you imported the Divi Mega Menu layouts (see below) in step 1, from the WordPress dashboard go to Divi Engine > Mega Menu and create a new layout.

# 3. DIVI MEGA MENU

The screenshot displays the WordPress admin interface for managing Divi Mega Menus. The main content area shows a list of menu items with the following data:

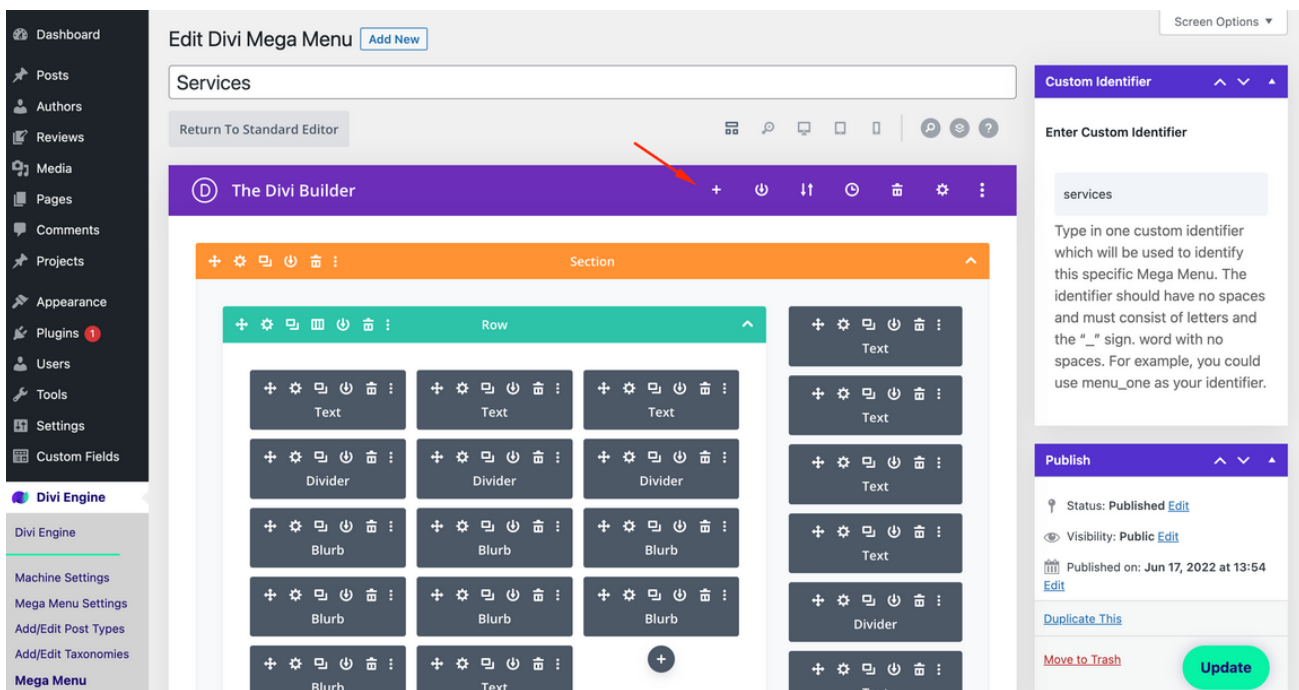

Title	Date
Services — Divi	Published 2022/06/17 at 1:54 pm
Parallax — Divi <a href="#">Edit</a>   <a href="#">Quick Edit</a>   <a href="#">Trash</a>   <a href="#">Duplicate This</a>	Published 2022/06/17 at 1:47 pm
Gradient — Divi	Published 2022/06/17 at 1:33 pm
Blurbs — Divi	Published 2022/06/17 at 1:15 pm
Reviews — Divi	Published 2022/06/17 at 12:48 pm
Consoles — Divi	Published 2022/05/23 at 12:38 pm

The left sidebar shows the 'Divi Engine' menu with 'Mega Menu' highlighted. The 'Add New' button is located at the top of the main content area.

# 3. DIVI MEGA MENU

## Step 3: Importing Mega Menu Layouts

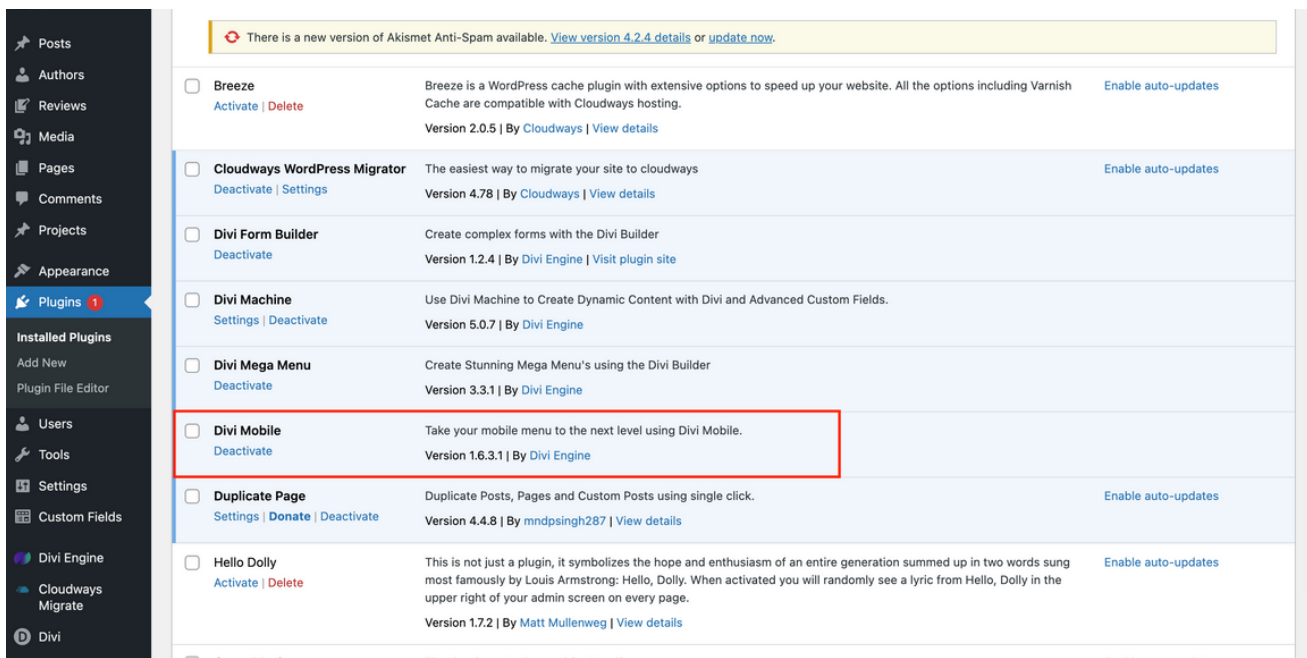

In your new Divi Mega Menu Layout, hit the plus (+) sign indicated below and import the labeled Mega Menu layout you would like to use.

# 4. DIVI MOBILE

## Step 1: Install the Mobile Plugin

To use the Mobile Menu layout, it is necessary to have the Divi Mobile plugin installed, if you don't have it, you can get it [here](#).

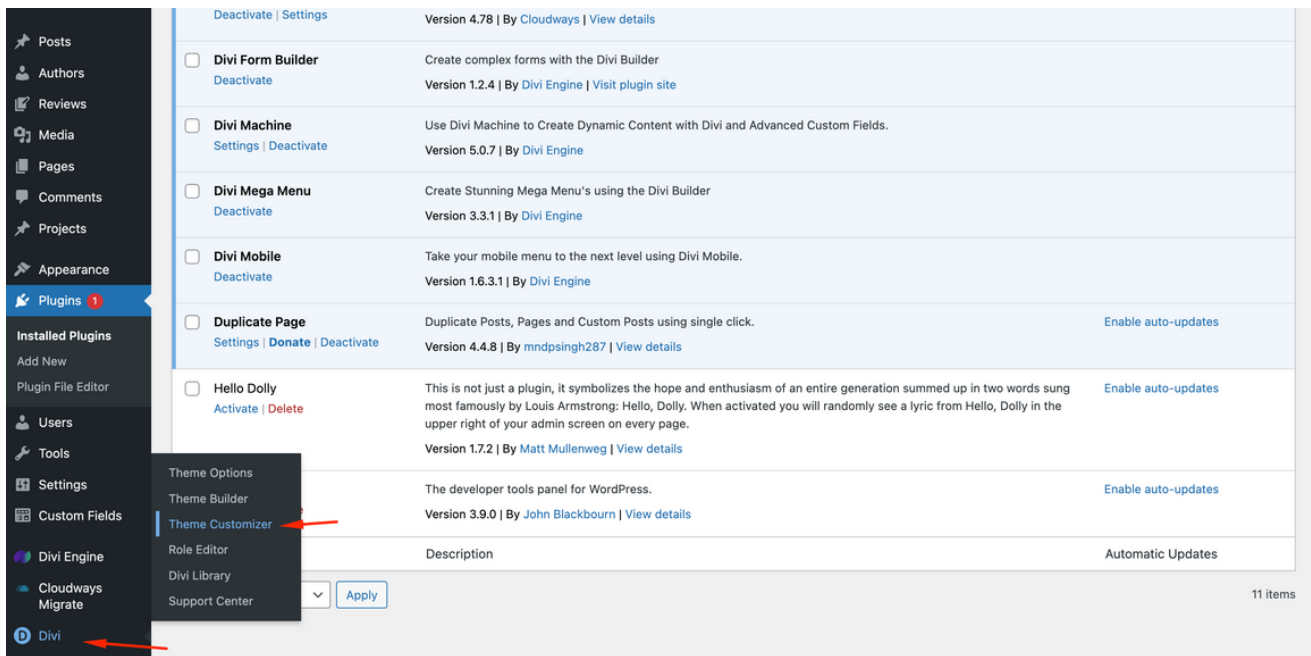

The screenshot shows the WordPress dashboard's 'Plugins' page. A notification at the top indicates a new version of Akismet Anti-Spam is available. The main content area lists several installed plugins. The 'Divi Mobile' plugin is highlighted with a red rectangular box. The 'Divi Mobile' entry shows it is currently deactivated, with a version of 1.6.3.1 by Divi Engine. Other visible plugins include Breeze, Cloudways WordPress Migrator, Divi Form Builder, Divi Machine, Divi Mega Menu, Duplicate Page, and Hello Dolly.

Plugin Name	Description	Version	Author	Actions
Breeze	Breeze is a WordPress cache plugin with extensive options to speed up your website. All the options including Varnish Cache are compatible with Cloudways hosting.	Version 2.0.5	By Cloudways	Activate   Delete   Enable auto-updates
Cloudways WordPress Migrator	The easiest way to migrate your site to cloudways	Version 4.78	By Cloudways	Deactivate   Settings   Enable auto-updates
Divi Form Builder	Create complex forms with the Divi Builder	Version 1.2.4	By Divi Engine	Deactivate   Visit plugin site
Divi Machine	Use Divi Machine to Create Dynamic Content with Divi and Advanced Custom Fields.	Version 5.0.7	By Divi Engine	Settings   Deactivate
Divi Mega Menu	Create Stunning Mega Menu's using the Divi Builder	Version 3.3.1	By Divi Engine	Deactivate
<b>Divi Mobile</b>	Take your mobile menu to the next level using Divi Mobile.	Version 1.6.3.1	By Divi Engine	Deactivate
Duplicate Page	Duplicate Posts, Pages and Custom Posts using single click.	Version 4.4.8	By mndpsingh287	Settings   Donate   Deactivate   Enable auto-updates
Hello Dolly	This is not just a plugin, it symbolizes the hope and enthusiasm of an entire generation summed up in two words sung most famously by Louis Armstrong: Hello, Dolly. When activated you will randomly see a lyric from Hello, Dolly in the upper right of your admin screen on every page.	Version 1.7.2	By Matt Mullenweg	Activate   Delete   Enable auto-updates

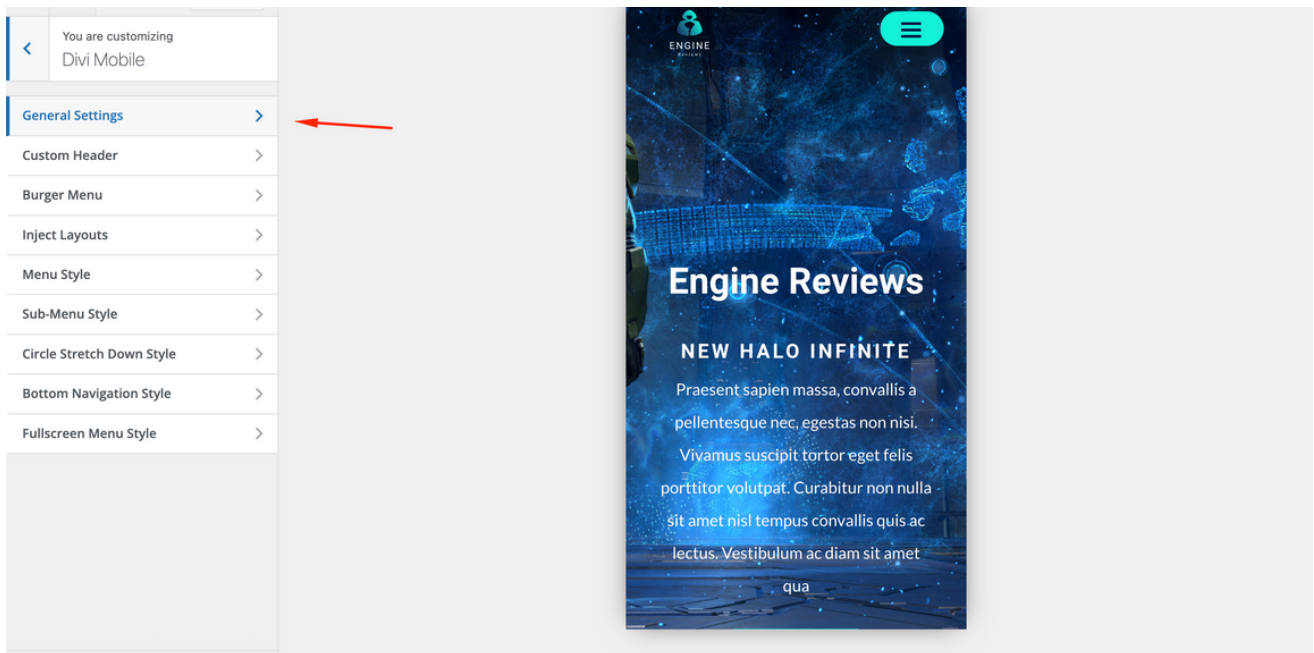

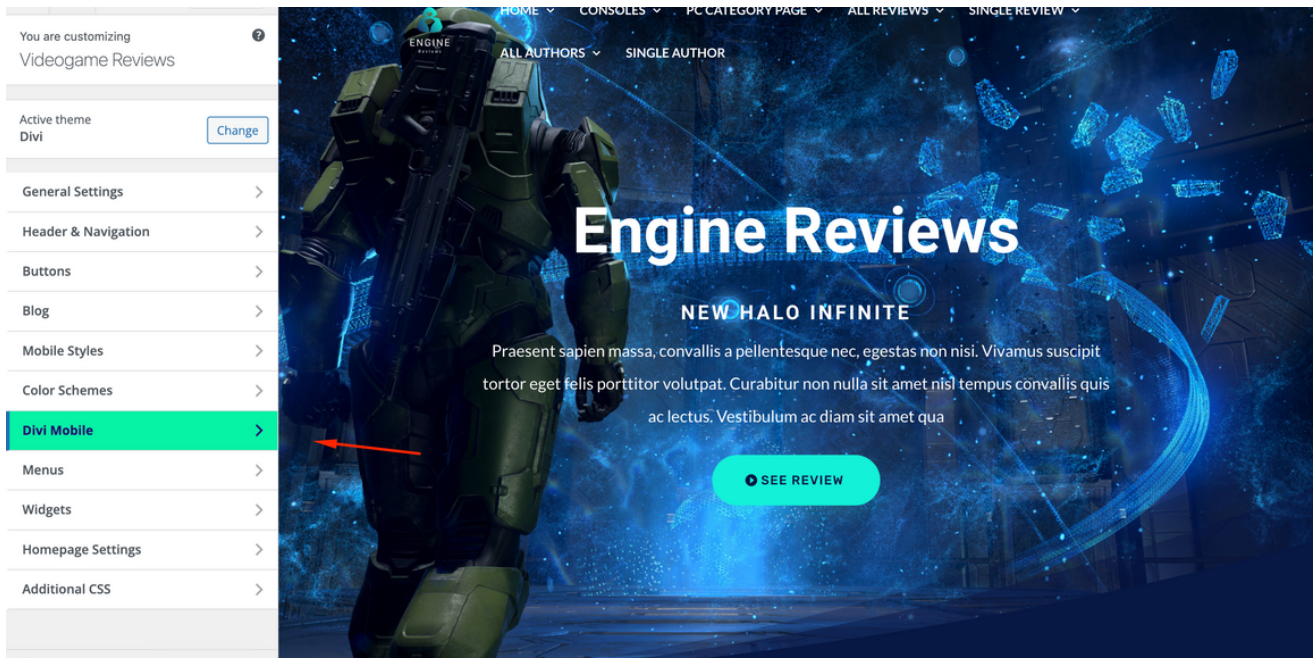

# 4. DIVI MOBILE

## Step 2: Using the Divi Mobile Layouts

Since you imported the Divi Mobile layouts (see below) in step 1, from the WordPress dashboard go to Divi > Theme Customizer > Divi Mobile > General Settings > Here you can select one of our pre-made menu styles or you can create your own one.

# 4. DIVI MOBILE

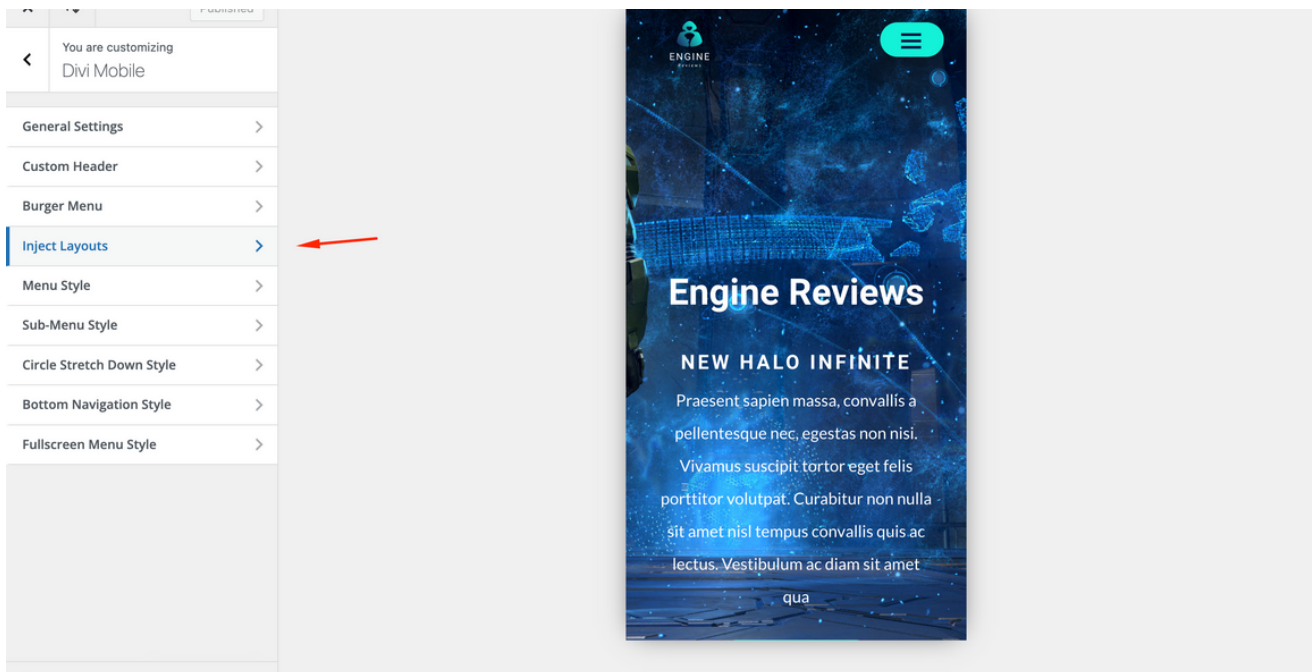

## 4. DIVI MOBILE

**Note: Your menu might not look exactly the menu in the demo, just play with the menu settings in Divi Mobile > General**

### Step 3: Injecting the layout that goes above the menu

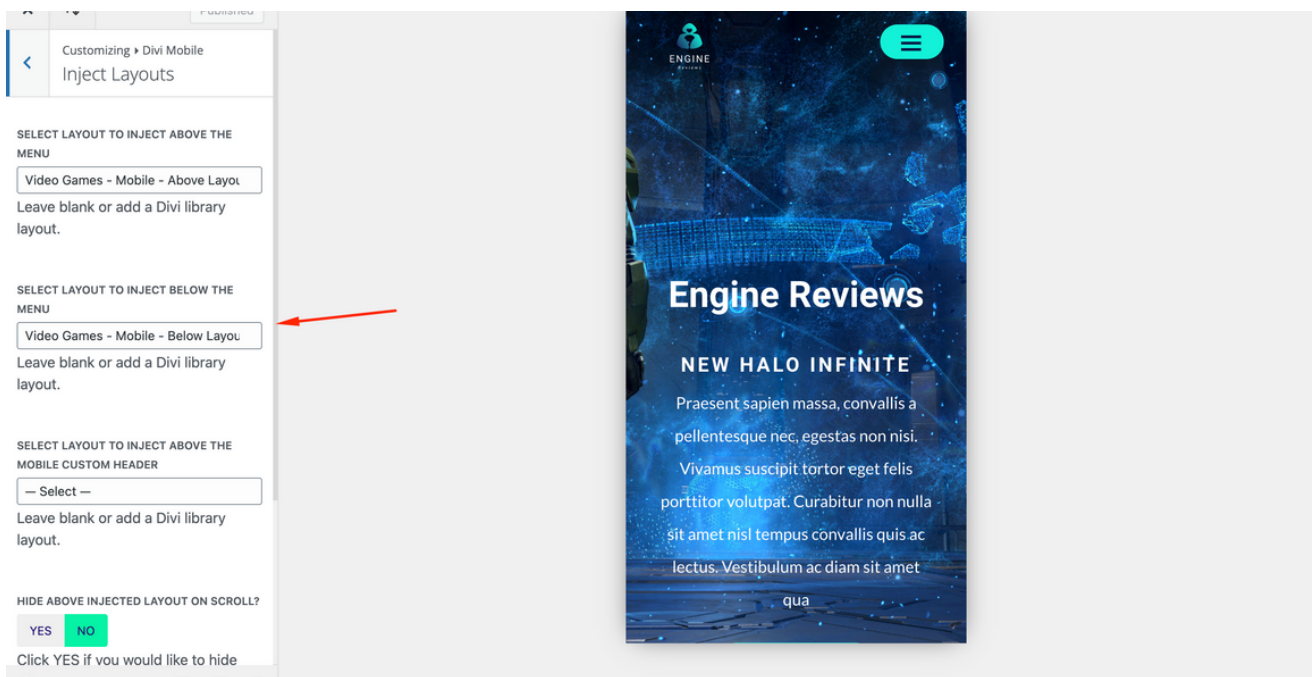

To inject the layouts that goes above the menu, just go to Divi > Theme Customizer > Divi Mobile > Inject Layouts > Select Layout to Inject Above the Menu and choose the layout "layout with divi mobile above in the name"

# 4. DIVI MOBILE

## Step 4: Injecting the layout that goes below the menu

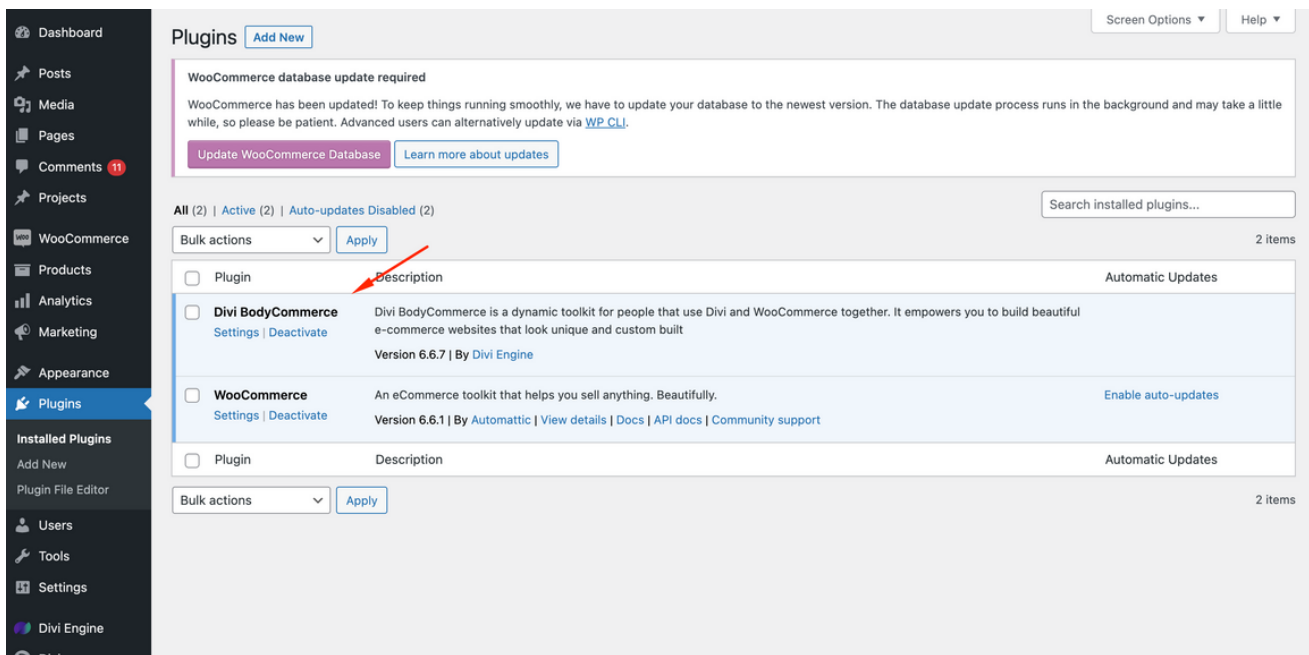

To inject the layouts that goes below the menu, just go to Divi > Theme Customizer > Divi Mobile > Inject Layouts > Select Layout to Inject Below the Menu and choose the layout "name of the below layout"

# 5. BODYCOMMERCE

## Step 1: Install the BodyCommerce

To use our BodyCommerce layouts, it is necessary to have the Divi BodyCommerce plugin installed, if you don't have it, you can get it [here](#).

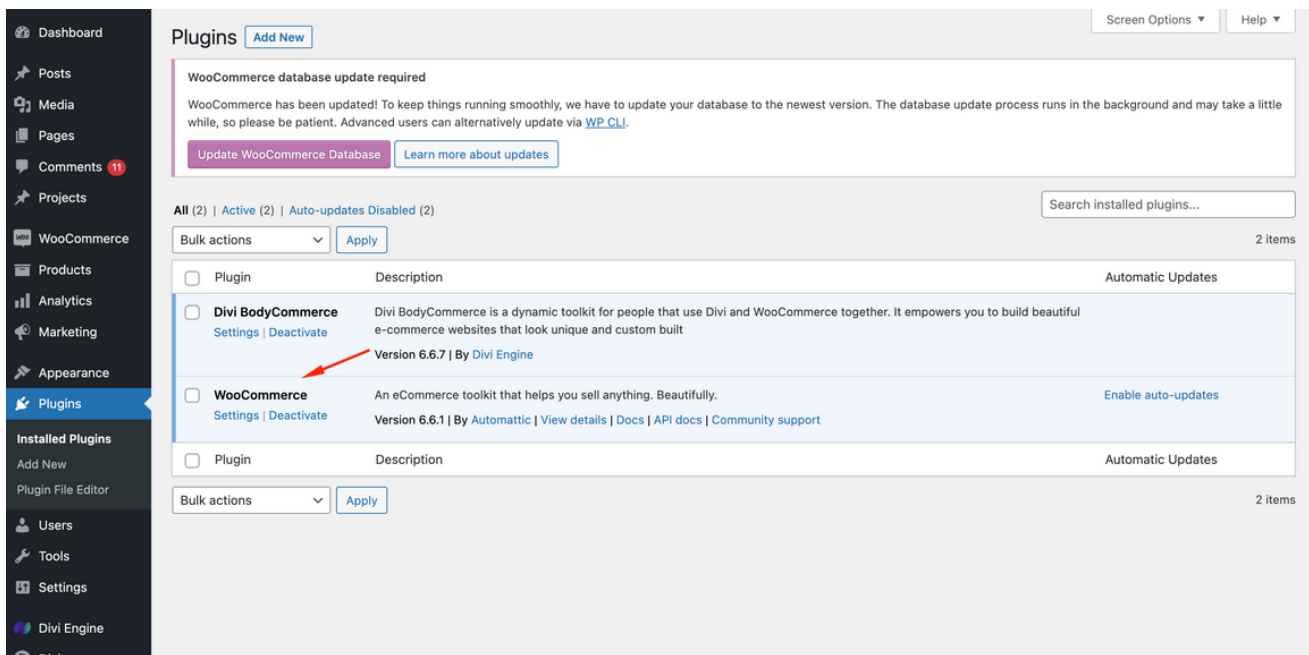

The screenshot shows the WordPress dashboard's Plugins page. On the left is a dark sidebar with navigation options: Dashboard, Posts, Media, Pages, Comments (11), Projects, WooCommerce, Products, Analytics, Marketing, Appearance, Plugins (highlighted), Installed Plugins, Add New, Plugin File Editor, Users, Tools, Settings, Divi Engine, and Divi. The main content area is titled 'Plugins' and includes an 'Add New' button, 'Screen Options', and 'Help' links. A notification banner at the top states 'WooCommerce database update required' with buttons for 'Update WooCommerce Database' and 'Learn more about updates'. Below this, a search bar for installed plugins is present. The plugin list shows two items: 'Divi BodyCommerce' (Version 6.6.7 by Divi Engine) and 'WooCommerce' (Version 6.6.1 by Automatic). The 'Divi BodyCommerce' row is highlighted in blue, and a red arrow points to the 'Description' column header. The 'WooCommerce' row has a link to 'Enable auto-updates'. At the bottom, there are 'Bulk actions' and 'Apply' buttons, and a '2 items' count.

# 5. BODYCOMMERCE

## Step 2: WooCommerce Installed

Make sure you have Divi and WooCommerce installed and activated.

The screenshot shows the WordPress dashboard's Plugins page. On the left is a dark sidebar with navigation options: Dashboard, Posts, Media, Pages, Comments (11), Projects, WooCommerce, Products, Analytics, Marketing, Appearance, Plugins (highlighted), Installed Plugins, Add New, Plugin File Editor, Users, Tools, Settings, Divi Engine, and Divi. The main content area is titled 'Plugins' and includes a search bar and a 'WooCommerce database update required' notification. Below the notification is a table of installed plugins:

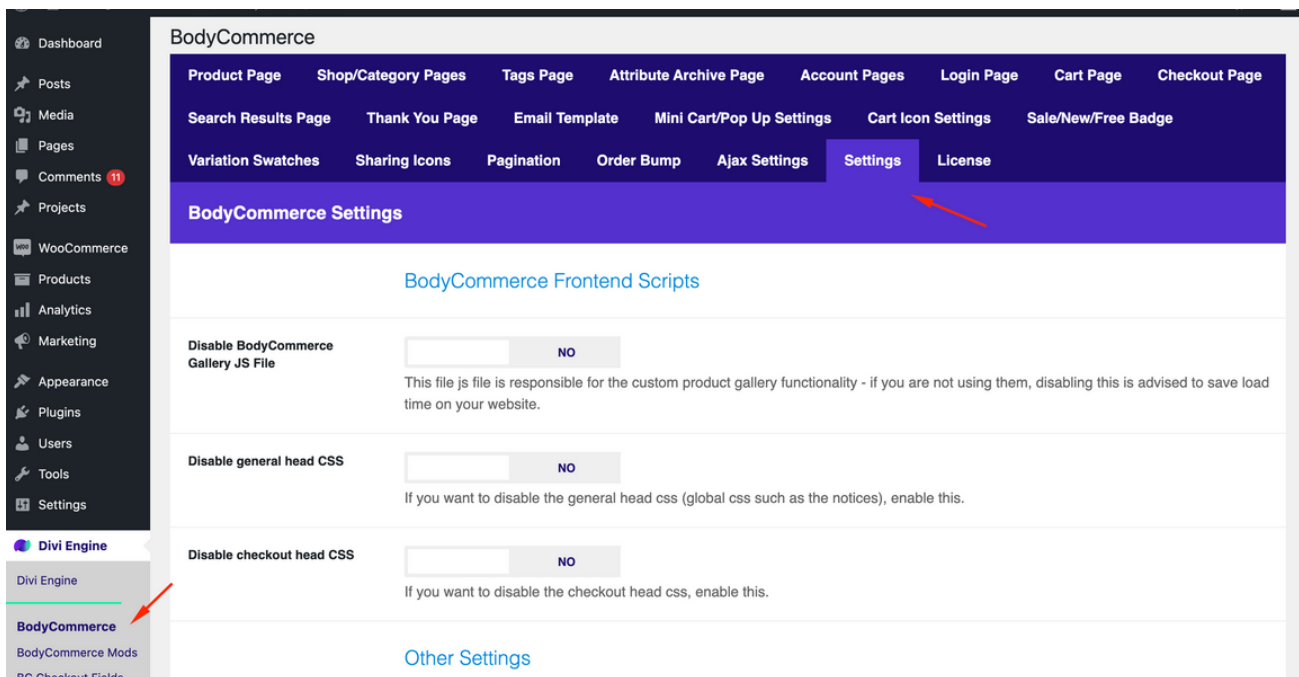

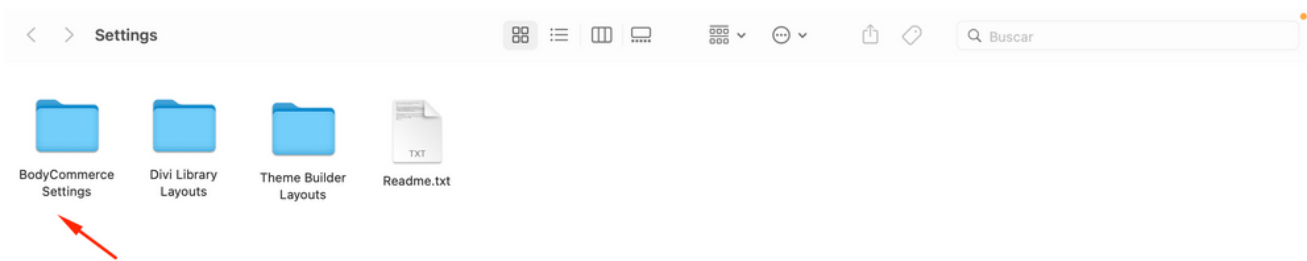

Plugin	Description	Automatic Updates
<input type="checkbox"/> <b>Divi BodyCommerce</b> <a href="#">Settings</a>   <a href="#">Deactivate</a>	Divi BodyCommerce is a dynamic toolkit for people that use Divi and WooCommerce together. It empowers you to build beautiful e-commerce websites that look unique and custom built. Version 6.6.7   By Divi Engine	
<input type="checkbox"/> <b>WooCommerce</b> <a href="#">Settings</a>   <a href="#">Deactivate</a>	An eCommerce toolkit that helps you sell anything. Beautifully. Version 6.6.1   By Automatic   <a href="#">View details</a>   <a href="#">Docs</a>   <a href="#">API docs</a>   <a href="#">Community support</a>	<a href="#">Enable auto-updates</a>
<input type="checkbox"/> Plugin	Description	Automatic Updates

At the bottom of the table, there are 'Bulk actions' and 'Apply' buttons, and a note that there are 2 items. A red arrow points to the 'Divi BodyCommerce' plugin entry.

# 5. BODYCOMMERCE

## Step 3: Importing Divi BodyCommerce Settings

Import our settings in the zip file BodyCommerce Settings > "name of the layout.CSV. Import this in the settings tab located at: BodyCommerce > Settings > Upload your setting file

# 5. BODYCOMMERCE

- Media
- Pages
- Comments 11
- Projects
- WooCommerce
- Products
- Analytics
- Marketing
- Appearance
- Plugins
- Users
- Tools
- Settings
- Divi Engine**
- Divi Engine

Here you can export and import the settings of BodyCommerce. It will ONLY export/import the settings in Divi Engine > BodyCommerce and Divi Engine > BodyCommerce Mods

Upload your setting file

Choose File

Import Settings

Save Settings

Export Settings

Download

Remove Unused Tabs for products from database

Remove Unused Tabs from Database

Remove Empty Rows From Database

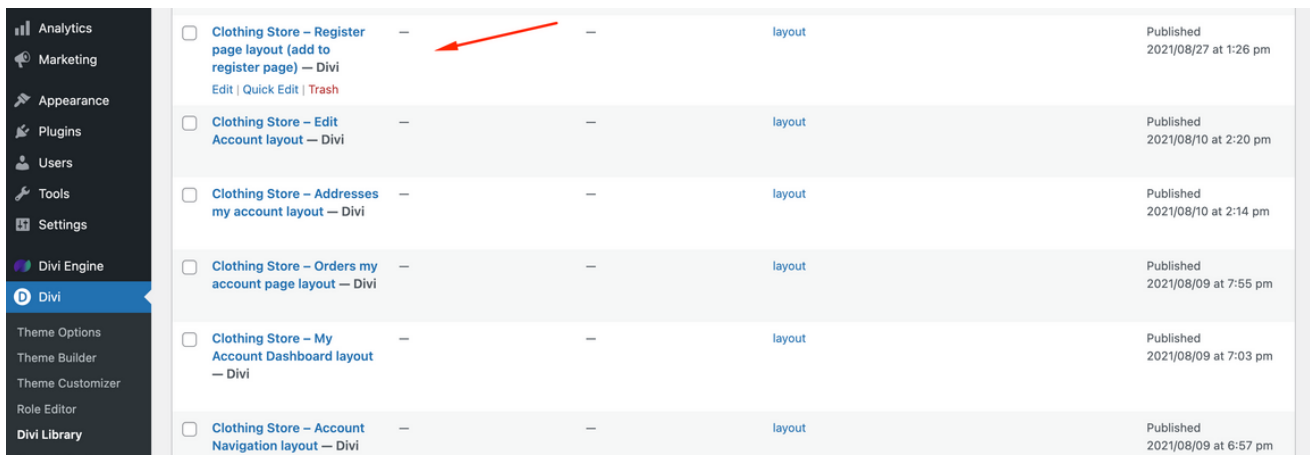

If you have been using BodyCommerce for a while, you might want to use this tool. There may be unused rows in your database for each product. Run this action to remove these. NOTE: PLEASE BACK UP YOUR DATABASE FIRST! We wont be liable for any issues with the database after this. We strongly suggest doing this on a dev site to check. It should be perfect, but every website is different so head to test on all situations. This should be a full record on your website.

# 5. BODYCOMMERCE

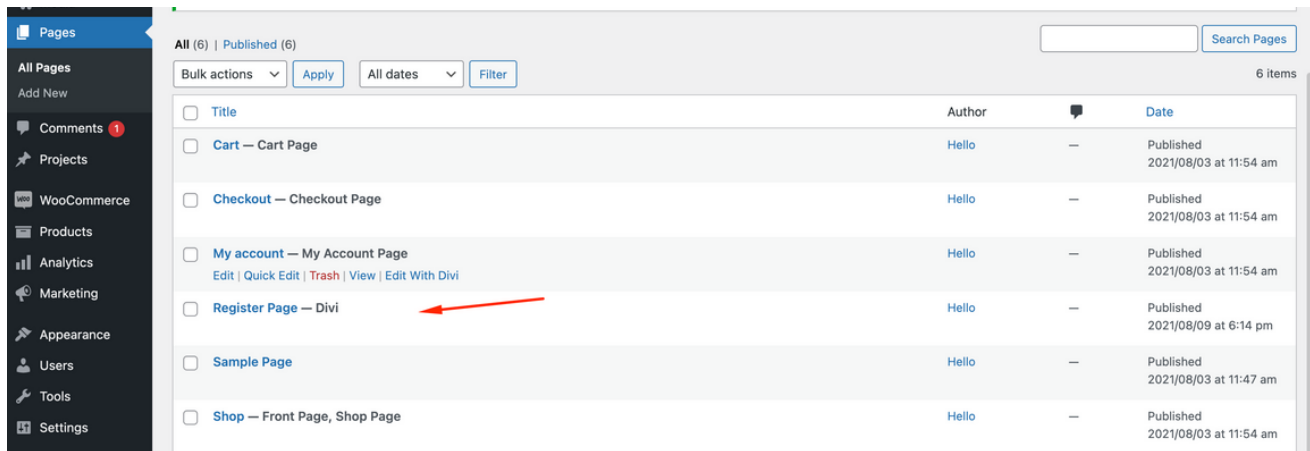

## Step 4: Creating the Registration Page

IMPORTANT!! For some Layouts you will need to create your registration Page and add the corresponding layout for that:

1: Register Page Layout (Page Title as "Register")

Layout Name	Type	Status	Published Date
Clothing Store – Register page layout (add to register page) – Divi	layout	Published	2021/08/27 at 1:26 pm
Clothing Store – Edit Account layout – Divi	layout	Published	2021/08/10 at 2:20 pm
Clothing Store – Addresses my account layout – Divi	layout	Published	2021/08/10 at 2:14 pm
Clothing Store – Orders my account page layout – Divi	layout	Published	2021/08/09 at 7:55 pm
Clothing Store – My Account Dashboard layout – Divi	layout	Published	2021/08/09 at 7:03 pm
Clothing Store – Account Navigation layout – Divi	layout	Published	2021/08/09 at 6:57 pm

Title	Author	Date
Cart – Cart Page	Hello	Published 2021/08/03 at 11:54 am
Checkout – Checkout Page	Hello	Published 2021/08/03 at 11:54 am
My account – My Account Page	Hello	Published 2021/08/03 at 11:54 am
Register Page – Divi	Hello	Published 2021/08/09 at 6:14 pm
Sample Page	Hello	Published 2021/08/03 at 11:47 am
Shop – Front Page, Shop Page	Hello	Published 2021/08/03 at 11:54 am

# 5. BODYCOMMERCE

**Note 1:** When you add your products the most important thing here is to:

- Make sure you add content in the editor section on each product - this could be the Divi Builder or just the default editor text.

The screenshot displays the 'Editar producto' (Edit product) interface in Body Commerce. The product title is 'Control Para Minisplit Benelux Lennox Friko Rheem Gykq-36'. The permanent link is <https://controlesremotos.com.mx/producto/control-para-min...ko-rheem-gykq-36/>. A purple button labeled 'Usar el constructor Divi' is visible. The main editor area contains the following text:

Estimado comprador: este control remoto únicamente es compatible para tu dispositivo si el control remoto anterior que usabas era físicamente igual al de la imagen publicada en caso contrario "no" funcionará en lo absoluto. Te pedimos revisar a detalle la información antes de realizar la compra. Evita devoluciones posteriores.

Control Remoto Compatible Para Aire Acondicionado Minisplit

- No Requiere Programación
- Gran Alcance
- Usa Dos Baterías Aaa
- Fabricado Con Materiales De Alta Calidad

Compatible con las marcas y modelos:

- Rheem
- Tcl
- Friko

The right sidebar contains settings for 'Ajustes de página de Divi', 'Ocultar navegación antes de desplazar' (set to 'Por defecto'), and 'Publicar' (Published: 14 Jun 2022 at 22:45). It also shows SEO status: 'Legibilidad: Aceptable' and 'SEO: Aceptable'. A 'Conecta Yoast SEO con Zapier' notification is present. The bottom right has 'Copiar a un nuevo borrador', 'Mover a la papelera', and 'Actualizar' buttons.

# 5. BODYCOMMERCE

**Note 2:** If the layouts do not get assigned in the settings of BodyCommerce it might be because the ID's are not the same. If this happens, simply add them manually.

- They are all named in a way to easily identify them, so for example, "Cosmetics – Cart Page" would be the layout for the cart page.

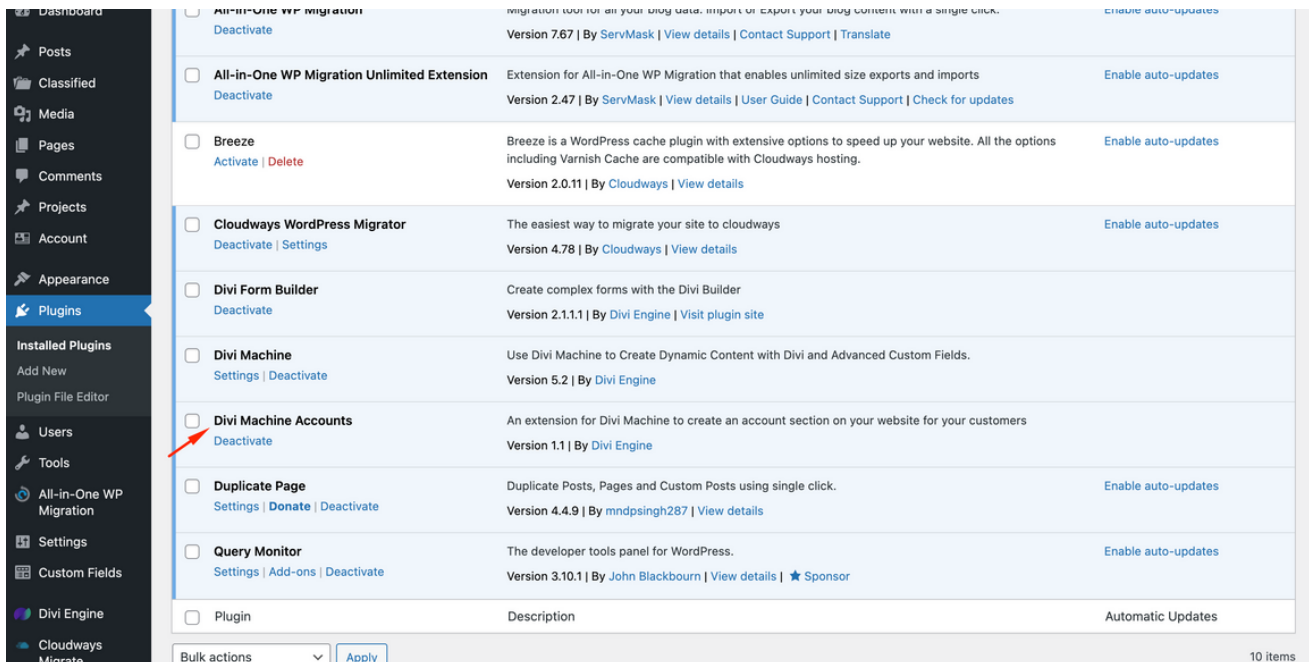

The screenshot shows the BodyCommerce settings page. The left sidebar contains navigation links for Dashboard, Posts, Media, Pages, Comments, Projects, WooCommerce, Products, Analytics, Marketing, Appearance, Plugins (2), Users, Tools, and Settings. The main content area is titled 'BodyCommerce' and has a dark blue header with tabs for Product Page, Shop/Category Pages, Tags Page, Attribute Archive Page, Account Pages, Login Page, Cart Page, and Checkout Page. Below the header, there are several sections of settings:

- Product Page Template:** A dropdown menu is set to 'Wine Store - Product Page Layout'. A red arrow points to this dropdown. Below it is a green 'Edit this layout' button and a note: 'Leave or change to -Select- to have the default WooCommerce template.'
- Make the Product Page Fullwidth?:** A toggle switch is set to 'NO'.
- Different Product Templates Per Category?:** A toggle switch is set to 'NO'. Below it is a note: 'Enable this if you want different templates for different shop categories'. A second red arrow points to the 'Red Wine' category dropdown menu.
- Red Wine:** A dropdown menu is set to '- Select -'. Below it is a note: 'Select the template/layout that you want to display as the category template for Red Wine - it will override the default one.'

# 6. DIVI MACHINE ACCOUNTS

## Step 1: Install the Divi Machine Accounts Plugin

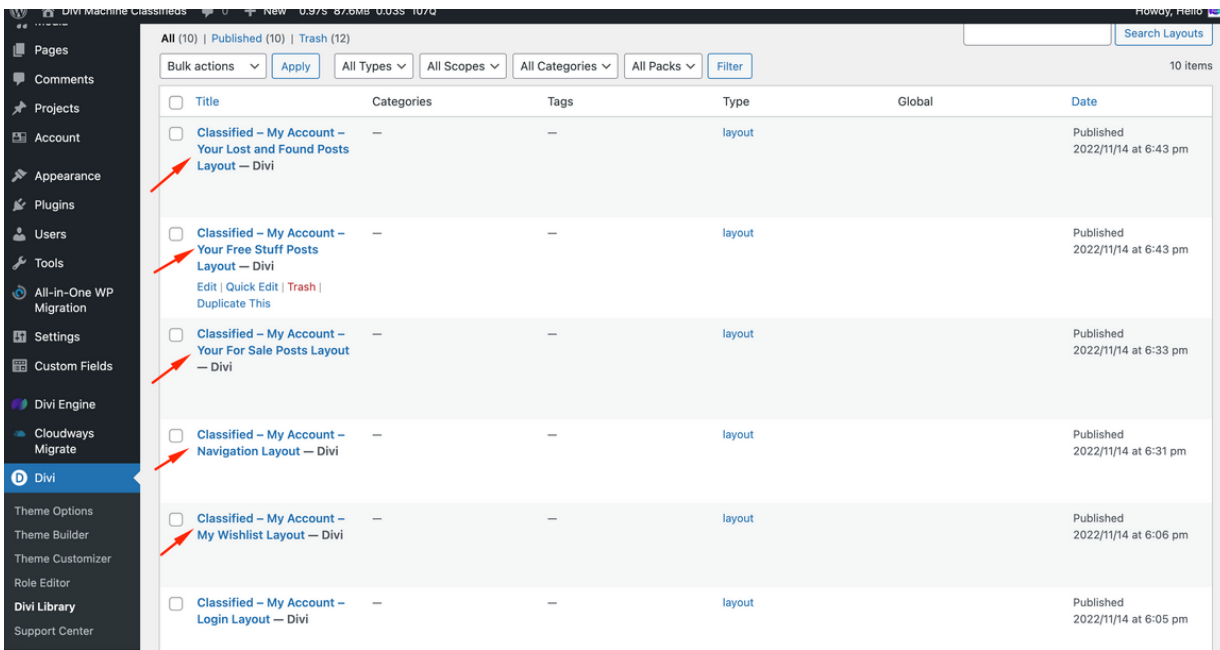

To use our Divi Machine Accounts layouts, it is necessary to have the Divi Machine Accounts plugin installed, if you don't have it, you can get it [here](#).

# 6. DIVI MACHINE ACCOUNTS

## Step 2: Using the Divi Machine Accounts Layouts

Since you imported the Divi Machine Accounts layouts to the Divi Library (see below in step 1), from the WordPress dashboard go to Account and create new Custom Endpoint Layouts using the imported layouts.

# 6. DIVI MACHINE ACCOUNTS

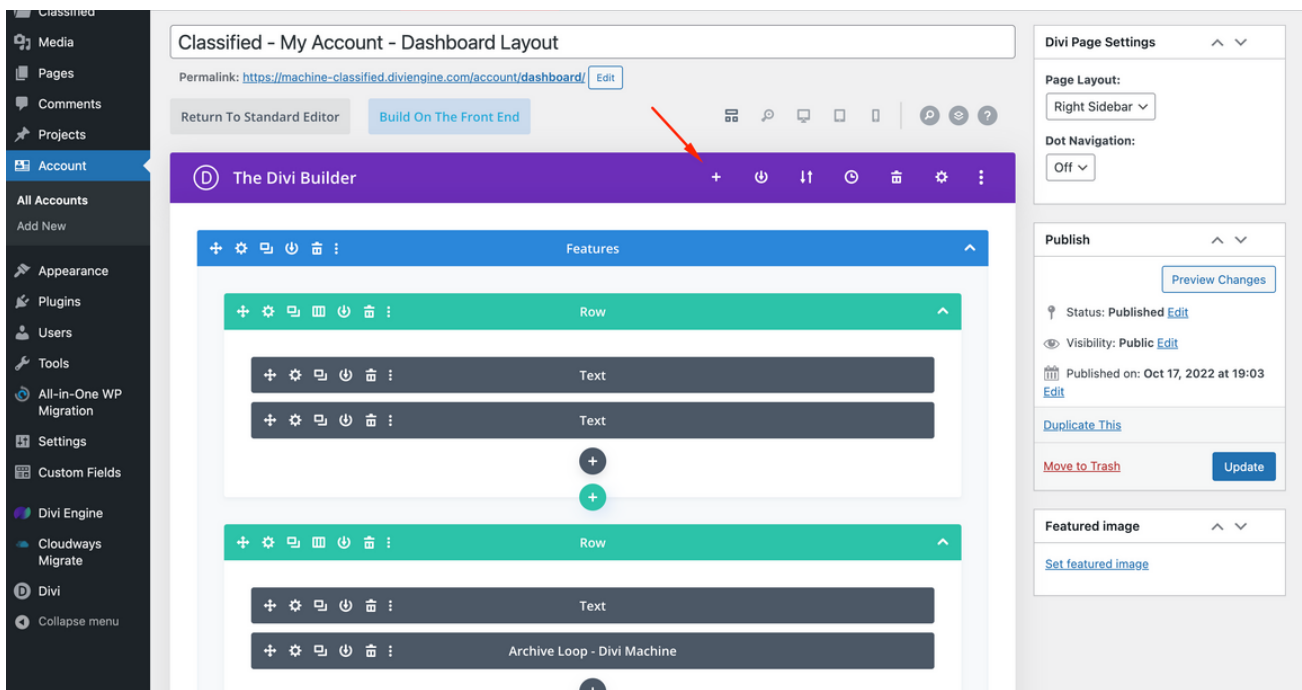

The screenshot displays the 'Account' management interface. At the top, there is a header with 'Account' and an 'Add New' button. Below this, a message states: 'Divi Machine Accounts is inactive, please enter your [License Key](#) to get updates'. The main content area shows a list of 7 items, all published. The list includes titles such as 'Classified - My Account - Dashboard Layout - Divi', 'Classified - My Account - Login Layout - Divi', and 'Classified - My Account - My Wishlist Layout - Divi'. Each item has a 'Date' column showing the publication time. A sidebar on the left contains navigation options like 'Dashboard', 'Posts', 'Media', 'Pages', 'Comments', 'Projects', 'Account', 'All Accounts', 'Appearance', 'Plugins', 'Users', 'Tools', 'All-in-One WP Migration', 'Settings', 'Custom Fields', 'Divi Engine', and 'Cloudways Migrate'. A red arrow points to the 'Add New' button in the top left of the account list.

<input type="checkbox"/>	Title	Date
<input type="checkbox"/>	Classified - My Account - Dashboard Layout - Divi <small>Edit   Quick Edit   Trash   View   Duplicate This</small>	Published 2022/10/17 at 7:03 pm
<input type="checkbox"/>	Classified - My Account - Login Layout - Divi	Published 2022/10/17 at 7:03 pm
<input type="checkbox"/>	Classified - My Account - My Wishlist Layout - Divi	Published 2022/10/24 at 5:06 pm
<input type="checkbox"/>	Classified - My Account - Navigation Layout - Divi	Published 2022/10/17 at 7:03 pm
<input type="checkbox"/>	Classified - My Account - Your For Sale Posts Layout - Divi	Published 2022/10/24 at 1:51 pm
<input type="checkbox"/>	Classified - My Account - Your Free Stuff Posts Layout - Divi	Published 2022/10/24 at 1:59 pm
<input type="checkbox"/>	Classified - My Account - Your Lost and Found Posts Layout - Divi	Published 2022/10/18 at 3:37 pm
<input type="checkbox"/>	Title	Date

# 6. DIVI MACHINE ACCOUNTS

## Step 3: Importing Machine Accounts Layouts

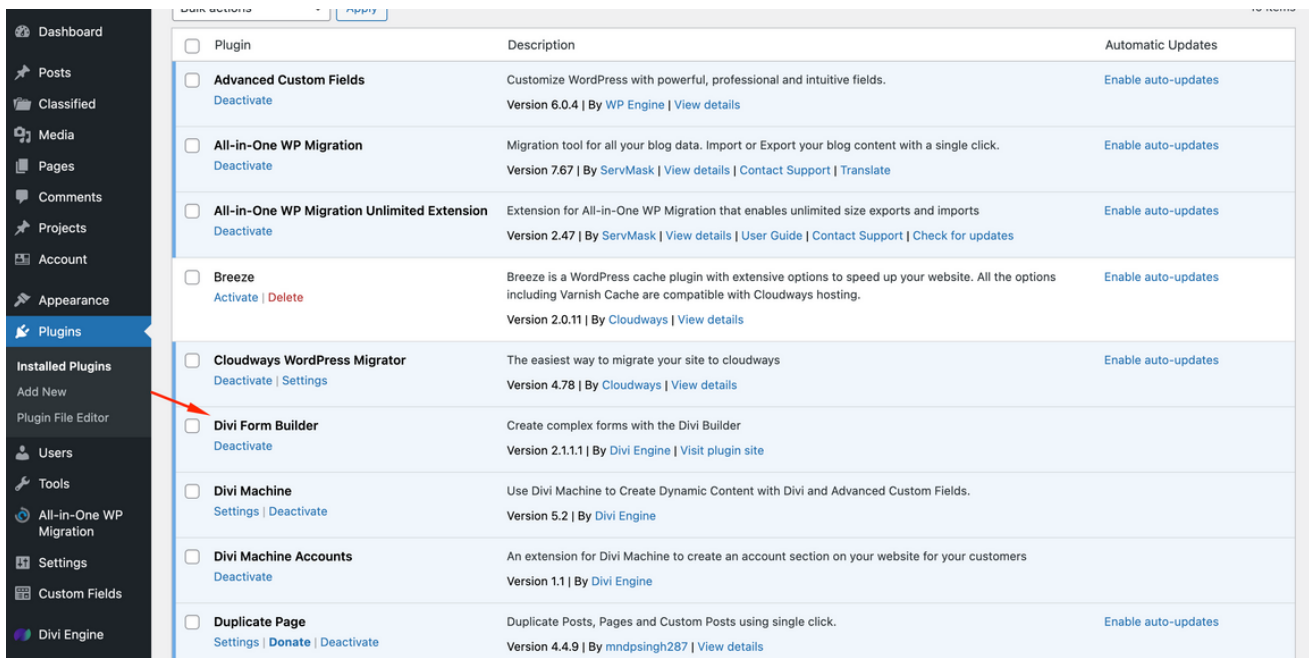

In your new Divi Machine Accounts Layout, hit the plus (+) sign indicated below and import the labeled Machine Account layout you would like to use.

# 7. DIVI FORM BUILDER

## Step 1: Install the Divi Form Builder Plugin

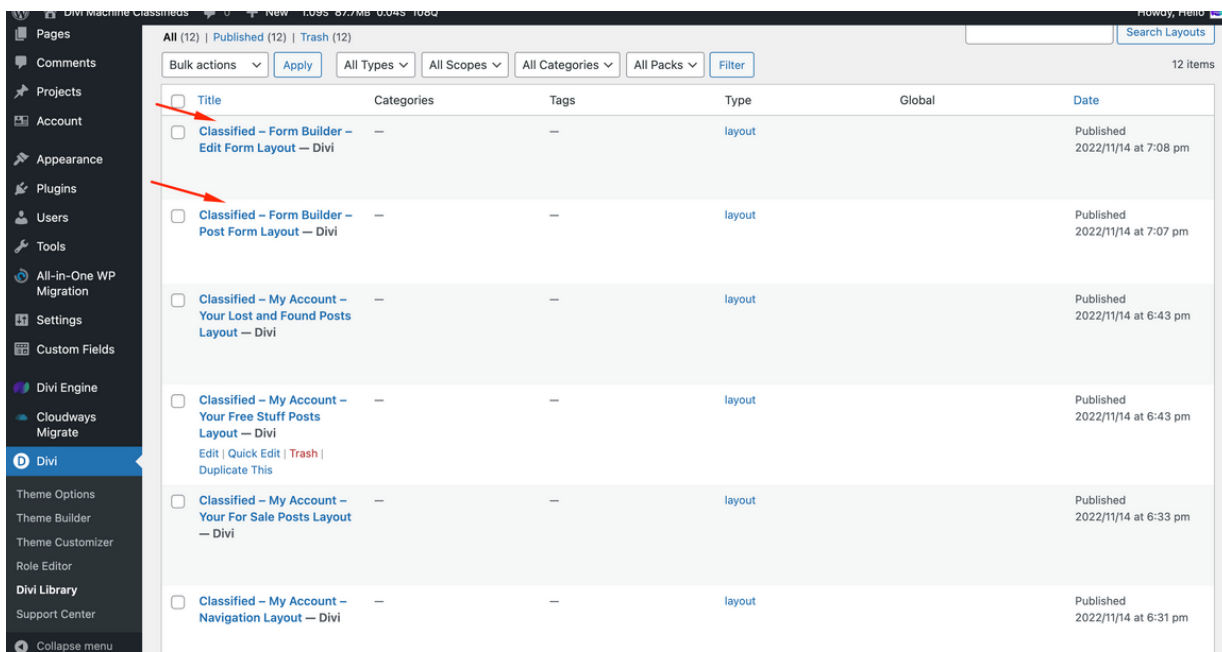

To use our Divi Form Builder layouts, it is necessary to have the Divi Form Builder plugin installed, if you don't have it, you can get it [here](#).

# 7. DIVI FORM BUILDER

## Step 2: Using the Divi Form Builder Layouts

Since you imported the Divi Form Builder layouts (see below in step 1), from the WordPress dashboard go to Pages and create a new one.

# 7. DIVI FORM BUILDER

The screenshot displays the WordPress dashboard's 'Pages' management screen. The left sidebar contains a navigation menu with 'Pages' highlighted. The main area shows a list of pages with the following data:

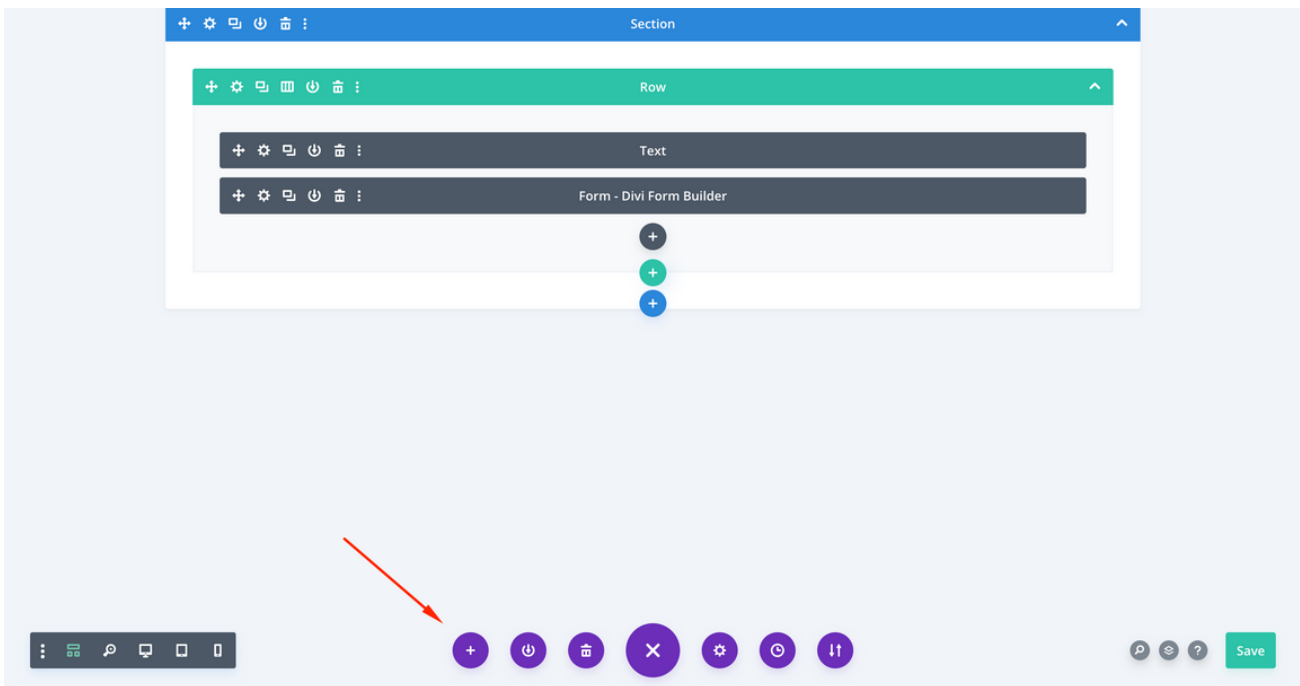

<input type="checkbox"/>	Title	Author		Date
<input type="checkbox"/>	Classified – Form Builder – Edit Form Layout – Divi	Hello	–	Published 2022/10/17 at 7:29 am
<input type="checkbox"/>	Classified – Form Builder – Post Form Layout – Divi <a href="#">Edit</a>   <a href="#">Quick Edit</a>   <a href="#">Trash</a>   <a href="#">View</a>   <a href="#">Duplicate This</a>   <a href="#">Edit With Divi</a>	Hello	–	Published 2022/10/27 at 1:57 pm
<input type="checkbox"/>	Home – Front Page, Divi	Hello	–	Published 2021/01/19 at 2:44 pm
<input type="checkbox"/>	Privacy Policy – Draft, Privacy Policy Page	Hello	–	Last Modified 2021/01/19 at 2:44 pm
<input type="checkbox"/>	Title	Author		Date

# 7. DIVI FORM BUILDER

## Step 3: Importing Divi Form Layouts

In your new Page, hit the plus (+) sign indicated below and import the labeled Divi Form layout you would like to use.

# 7. DIVI FORM BUILDER

## Step 4: Field Mapping

Finally, make sure that all your form fields are mapping correctly with your Advanced Custom Fields created previously. If you want to know more about this you can read this [article](#).
